PACIFIC  
MOUNTAIN  
REGION  
INDUSTRY & INNOVATION  
EXPO 09

NOVEMBER  
6 AND 7, 2009

Mark your calendar for an event geared toward developing partnerships for the emerging economy in the Pacific Mountain region. This year's expo has been engineered to bring manufacturers and their suppliers together to build upon and share information and ideas with industry sectors (construction and energy) that will help keep Washington competitive.

As businesses look for new ways to move ahead, innovative thinking is often needed. It's the perfect time to come, learn and share in the exhibition and discussion of new products, technologies and processes that are centered on competing in today's global economy. Exhibitors will showcase industry within Grays Harbor, Lewis, Mason, Pacific and Thurston counties.

The Pacific Mountain Region Industry & Innovation Expo will be a time to meet the people behind the products, services and the partnerships that support them. Industry, non-profit groups, schools and governmental agencies are all helping to support and keep Washington's innovative spirit at the forefront of business. That's why you'll also find a wide variety of informational seminars, training workshops and certification classes all under one roof for one time.

A schedule of activities and other event details will be available soon. Please contact us through the e-mail provided below for information on becoming a sponsor or an exhibitor of the expo. In addition we would like to request a call for keynote speakers, presenters, workshops & training seminars. Your experience and participation will help shape the identity of our region. Please make plans to attend.

Sponsorship levels include the following:

- Lead Sponsor, Exclusive Opportunity Limit of 1
- Principle Sponsors, Limit of 3
- Major Sponsors, Limit of 6
- Basic Sponsors, Limit of 10

Exhibitor spaces available, Limit of 108
